

Style Quiz

1. What is your favorite color scheme?

- **Warm colors** such as red, orange, and yellow, are associated with sun and fire, and therefore create a sensation that a space is several degrees warmer than actuality. Warm colors appear to advance toward and excite the viewer.

- **Cool colors** such as blue, violet, and green, are associated with air, sky, and water, and thus, are naturally cool and soothing. Cool colors tend to recede in a space and can create feelings of passiveness and calmness.

- **Neutral (monotone)** A neutral or monotone color scheme consists of various tints and shades of a neutral color such as black, white, gray, beige, tan or taupe. A neutral scheme is easily composed by selecting a neutral then building upon several values of that neutral. This scheme is often used as a backdrop for a striking accent color or for non-competing backgrounds when an important element is displayed, such as artwork.
